

Playnetic

Interactive playground equipment

Generate sustainable
Human Powered Energy
simply by playing

playNETIC
Human Powered Play

All Playnetic products are 100% human powered. The user generates the energy. There is no need for external electricity or batteries.

Playnetic products offer fun, exciting and challenging games through brightly illuminated push buttons or other forms of input.

Playnetic products can enrich the playing experience through LED lighting technology.

All Playnetic products are weather resistant.

All Playnetic products use MP3 coding format. This file is universal for audio. It makes it easy to create new content.

Several Playnetic products have a removable USB stick with MP3 audio files. It makes it easy to add new content.

All Playnetic products enhance the playing experience through beautiful audio design.

Your certified Playnetic dealer

Your business card here

Foreword

Roy Stein, founder Playnetic B.V.

The Playnetic company has its roots in The Netherlands, in a beautiful city called Zutphen. Since its founding in 2007, Playnetic has branched out all over the world. We are proud to have created long lasting relationships with development partners and dealers all across the globe.

What makes Playnetic so special? All of our playground equipment is Human Powered, truly interactive, unique and fun! Playnetic is, and always will be, all about play. Human Powered Play to be exact.

Our products enhance any public space, playground or playing experience. This is achieved by incorporating audio, push buttons, LED lighting, games, education and great design into our products.

Playnetic playground equipment is Human Powered! All of our products and technologies are powered sustainably by means of Human Power, making an external power supply or batteries redundant. Users simply generate energy by playing: jumping, spinning or swinging.

Play is such an essential part in the development of every human being. Our products invite both young and old to get up and start moving in a fun and interactive way.

Roy Stein,
Founder playnetic B.V.

playNETIC
Human Powered Play

www.playnetic.nl

Our mission is to get kids outside by offering fun, interactive playground equipment where you generate your own energy simply by playing.

Develop Together

Playnetic specializes in Human Powered Interactive Playground Equipment. Over the years we have gathered a lot of knowledge and experience regarding generating electricity and implementing electronics into playground equipment to make play structures more exciting and fun. Playground equipment manufacturers from all over the world rely on our expertise to create new, unique, interactive and exciting products that incorporate modern technologies. Collaborations are possible in many ways. Playnetic can deliver electrical components, design and create custom parts or even deliver a complete and ready to play product. On the next few pages you'll find a small selection of our third party collaborations.

As mentioned before, Playnetic has a lot of knowledge and experience regarding electronics and their implementation. Over time we've developed our own technology and components such as: push buttons, speakers, LED lighting, electricity generators, different mechanisms to generate electricity, printed circuit boards and many more. Other companies can use these components in their own products. Playnetic will provide the components needed, but the product and brand will be yours.
